13+ YEARS EXP.	12+ QASL TOOLS	10 QA SUPERVISED	99.3% HEALTH SCORE	1,300+ AI TEST CASES	100% E2E PASS RATE
-------------------	-------------------	---------------------	-----------------------	-------------------------	-----------------------

PROFESSIONAL SUMMARY

QA Tech Lead and Test Automation Architect with **13+ years of experience** designing software quality ecosystems in government, fintech, healthtech and e-commerce sectors. Creator of the **QASL ecosystem**, a suite of **12+ proprietary tools** implemented in production with documented results. Technical leader with direct supervision of **10 QA analysts** in simultaneous enterprise projects. Specialist in Shift-Left Testing, AI/LLM Testing, Mobile Testing with AI, MLOps QA, Performance Testing and Security Testing. Methodologies aligned with ISTQB v4.0, IEEE 829/830 and ISO/IEC 25010. Author of the **VCR Methodology** (Value + Cost + Risk), proprietary automation decision algorithm adopted in production. What sets me apart: I don't just run tests — I build the systems others use to run them.

- QASL-TOMEX v5.1: 3 coordinated AI agents (Claude/GPT-4/Gemini) — 100 issues detected in ~6 minutes automatically exploring paths on worldwide scope websites
- 99.3% Health Score in Staging environment — 413+ automated checks across multiple simultaneous enterprise systems
- 1,300+ test cases generated *before* development through static analysis with AI (40 gaps detected in 66 seconds with Claude API)
- 614+ test cases with Multi-LLM platform QASL NEXUS: 92.9 ILT Score · 100% E2E Pass Rate · 0 critical vulnerabilities
- Dual-VM QA Infrastructure with 29 tools approved by Management, Servers and SOC — first ecosystem of this level in Argentine government agencies
- QASL-MOBILE: only mobile framework with integrated AI (Claude Vision), SAST/DAST and New Relic + Grafana observability
- 55–60% reduction in critical defects in production · 40% increase in automated coverage
- Supervision and technical mentorship of 10 QA analysts in simultaneous enterprise projects

PROFESSIONAL EXPERIENCE

QA Tech Lead — Test Automation Architect

March 2024 – Present

EPIDATA Consulting • Government and enterprise sector • Multiple NDA clients • Buenos Aires • Hybrid

- Technical leader of 10 QA analysts in multiple simultaneous enterprise projects: SMART objectives, technical mentorship and deliverable quality control
- Design and implementation of the complete QASL ecosystem: 12+ proprietary tools in production (TOMEX, Certification Framework, MOBILE, NEXUS LLM, INGRID, MLOPS-LAYER, SENTINEL, BACKEND-LIVE, MTP)
- Dual-VM QA Infrastructure with 29 tools on RHEL 10, approved by Management, Servers and SOC; 5 Docker containers orchestrated with Grafana, Prometheus and InfluxDB
- Shift-Left static testing: 1,300+ test cases generated before first code; 40 gaps detected in 66 seconds through HU analysis with Claude API
- Proprietary Fullstack Scanner methodology: simultaneous UI and API validation with real-time Dual Panel; 99.3% Health Score with 413+ automated checks
- Complete CI/CD Pipeline GitLab Runner Docker: stages INFO → E2E → API → NOTIFY → DEPLOY with automatic PASS/FAIL notifications
- Performance Testing: Stress 200–1,000+ VUs and Soak 1–4h with K6 and JMeter; p50/p90/p99 metrics; race conditions and memory leaks detection
- Security Testing: OWASP ZAP (SQLi, XSS, CSRF, LFI), MobSF SAST for APKs, Garak/NVIDIA NeMo with OWASP LLM Top 10 2025
- Mobile Testing with AI: Maestro for Android/iOS, Claude Vision for autonomous UX/UI analysis, real-time New Relic + Grafana observability
- 55–60% reduction in critical defects · 40% increase in automated coverage

Stack: Playwright 1.50, TypeScript, Newman, K6, JMeter, Gatling, OWASP ZAP, Garak, MobSF, Maestro, GitLab CI/CD, GitLab Runner Docker, GitHub Actions, Docker, Docker Compose, React 18, Vite, PocketBase, Claude API, GPT-4, Gemini, Grafana, Prometheus, InfluxDB, Loki, New Relic, Allure, PostgreSQL 16, Node.js, Python, JIRA, Xray, RHEL 10

QA Automation Engineer

August 2020 – December 2024

UPEX • E-commerce • Fintech (PCI-DSS, ISO 8583) • Healthtech (HIPAA) • Remote

- 30% reduction in regression execution time with Playwright and TypeScript (Page Object Model, parallel execution)
- 40% increase in automated test coverage: regression, smoke, sanity and contract testing
- 55% reduction in critical defects in production
- Performance Testing with JMeter and K6; Security Testing with OWASP ZAP in critical flows (authentication, payments, PCI-DSS, HIPAA)
- CI/CD with GitHub Actions · Training of 15+ professionals in QA Automation and testing best practices

Stack: Playwright, TypeScript, Newman, Postman, JMeter, K6, OWASP ZAP, GitHub Actions, Docker, Allure, JIRA, TestRail

Project Manager / QA Lead

April 2013 – May 2020

STOP MEDICAL ESTENDELY • Healthcare sector • HIS Systems • Caracas, Venezuela • On-site

- Successful HIS implementation in 5 medical centers with no critical incidents in production
- 65% reduction in data migration errors · Coordination of teams up to 8 professionals · HIPAA compliance

QASL ECOSYSTEM — 12+ PROPRIETARY TOOLS

QASL-TOMEX v5.1 "The Tomograph" — Flagship 2026

Autonomous Multi-Agent QA Security Scanner · 3 AI Agents · 70 seconds

First autonomous QA audit system with Claude/Director, GPT-4/Veins and Gemini/Surface coordinated. Scans any URL in 3 dimensions: UI, APIs and code. Automatic Path Discovery of hidden routes, Data Exposure Scanner, autonomous Frontend Interactor. PDF report with vulnerabilities by code line in 70 seconds. Real-time Grafana dashboard.

Stack: Claude API, GPT-4, Gemini, Playwright, Grafana, TypeScript, Docker, Node.js

QASL-MOBILE — Shift-Left Mobile Testing with AI Validation

Only mobile framework with integrated AI · SAST/DAST · New Relic 5 pages · Real-time Grafana

Android/iOS automation with Maestro, APK static analysis with MobSF (SAST), dynamic security with OWASP ZAP mobile APIs, autonomous UX/UI analysis with Claude Vision. New Relic dashboard 5 executive pages and real-time Grafana. Health Score with 4 weighted components.

Stack: Maestro, MobSF, OWASP ZAP, Claude Vision, New Relic, Grafana, InfluxDB, Newman, Docker, ADB, Android SDK

QASL NEXUS LLM — Multi-LLM QA Platform

12 Microservices · 614+ TCs · 92.9 ILT Score · 100% E2E Pass Rate · 0 critical vulnerabilities

First QA platform with multiple LLMs. 12 microservices integrating Claude Opus/Sonnet, GPT-4 and Gemini 2.5 Pro. Proprietary VCR Decision Engine. MCP integration with Jira, Xray, TestRail and Azure DevOps.

Stack: TypeScript, Claude API, GPT-4, Gemini, PostgreSQL 16, Docker, MCP, K6, OWASP ZAP, Garak, Grafana

INGRID v2.0 — AI Assistant + LLM Testing Framework

LLM-as-Judge · Red-Teaming · OWASP LLM Top 10 2025 · NIST AI RMF

Framework for LLM systems testing with multi-dimensional evaluation: relevance, precision, coherence, completeness and hallucination detection. Red-Teaming with Garak/NVIDIA NeMo: prompt injection, jailbreak, PII leakage.

Stack: TypeScript, Claude API, Garak, Python, Grafana, Prometheus, Docker

QASL-BACKEND-LIVE-SCANNER — Integration Discovery Engine

Health Score 0–100 · Release Verdict · 30 Grafana panels · Production 2026

Analyzes E2E HAR files and automatically discovers cross-system integrations. Generates Health Score + Verdict: APPROVED / OBSERVATIONS / HIGH RISK. 12 Express.js API Endpoints with Infinity Datasource for live Grafana.

Stack: Node.js, Playwright HAR, Grafana, Express.js, Docker, SVG Animations

QASL-SENTINEL-UNIFIED — QA Command Center

Monitor · 55 Grafana panels · DEFCON System DC-1 to DC-5

Unified command center. Dual monitoring Backend APIs (Prometheus) + Frontend DOM (Playwright + InfluxDB). 55 Grafana panels in 8 sections. DEFCON system (DC-1 critical → DC-5 nominal).

Stack: Node.js, TypeScript, Playwright, Claude API, Grafana, Prometheus, InfluxDB, PDFKit, OWASP ZAP

DUAL-VM QA INFRASTRUCTURE — 29 TOOLS

Design, proposal and deployment of complete architecture approved by Management, Server Department and SOC (government NDA client). **First ecosystem of this level in Argentine government agencies.** 5 orchestrated Docker containers: Grafana, Prometheus, InfluxDB, Node Exporter, MobSF.

- **Automation VM** — 4 vCPUs, 7.5 GiB RAM, RHEL 10.1, 12 tools: Playwright 1.50, TypeScript, Newman, Allure, GitLab Runner CI/CD, Docker
- **Performance and Security VM** — 8 vCPUs, 15 GiB RAM, RHEL 10.1, 17 tools: K6, JMeter, OWASP ZAP, Garak, MobSF, Grafana, Prometheus, InfluxDB

TECHNICAL STACK

E2E Automation	Playwright 1.50, TypeScript, Page Object Model, Fixtures, Parallel Execution, Allure Reports
API Testing	Newman, Postman Collections, REST, SOAP, Contract Testing, automatic HTML reports
Performance Testing	K6, JMeter, Gatling — Stress 1,000+ VUs, Load Testing, Soak 1–4h, p50/p90/p99 metrics
Security Testing	OWASP ZAP, MobSF (mobile SAST/DAST), Garak (NVIDIA NeMo), OWASP Top 10, SQLi, XSS, CSRF, LFI
AI / LLM Testing	Claude API, GPT-4, Gemini 2.5 Pro, Garak Red-Teaming, LLM-as-Judge, OWASP LLM Top 10 2025
Mobile Testing	Maestro (Android/iOS), MobSF SAST/DAST, OWASP ZAP mobile APIs, Claude Vision (UX/UI), ADB
Observability	Grafana, Prometheus, InfluxDB, Loki, New Relic, executive dashboards, mobile PWA, dynamic PDF
CI/CD & DevOps	GitLab CI/CD, GitLab Runner Docker, GitHub Actions, Docker, Docker Compose, RHEL 10

VCR Methodology (proprietary) V+C+R for automation decision: VCR ≥9 → automate · VCR <9 → manual

CERTIFICATIONS

Playwright Certification — UPEX	2023 · Obtained
API Testing Certification — UPEX	2024 · Obtained
Claude Code in Action — Anthropic Academy	2025 · 87.5%
ISTQB Foundation Level v4.0	In progress

LANGUAGES

Spanish — Native English — Advanced technical reading and writing. Functional oral communication.
